

ELITE SCIENTIFIC INSTRUMENTS SDN BHD

We are a leading established scientific instrument supplier company in Malaysia since 2002. In recent years, we've grown in reputation and expanding rapidly to market in Malaysia including Sabah and Sarawak. We are Malaysia's No. 1 supplier for LICOR Biosciences (Lincoln, NE, USA) plant physiology products besides providing supports solution and customer services. We offer product applications assistance as well as conducting massive training and workshop nationwide. We are also in the midst of establishing our very own Service Centre providing technical support and repair maintenance related issues.

Testimonials

These are some of ELITE LI6400 XT Training Course's former candidates who are now trained and familiarized with using the LI 6400 XT:

Nur Afiqah – Universiti Putra Malaysia

“Every part of the training is good”

Nurul Shahnadz – Universiti
Kebangsaan Malaysia

“Very informative training and helpful
instructors”

ELITE LI6400XT Portable Photosynthesis System Training Course

A comprehensive course pioneered and designed by Elite in Malaysia, to prepare and provide suitable candidates (researchers, educators, students, lab assistants) with an understanding of the LI6400 XT Portable Photosynthesis System. The course objective is to educate candidates on the every basic to advanced operations of the LI6400 XT from doing survey to response curves measurements and also to study plant chlorophyll fluorescence. The course is conducted by experienced trainers with expertise in a variety of areas covered in the course. These trainers formerly and currently served with some of Malaysia's renowned universities and research institutions.

- Please kindly refer to ELITE LI6400 XTR Portable Photosynthesis System Training Course Module.

“Teaching photosynthesis is incredibly complex and challenging. While students may become familiar with words and descriptions of processes such as electron transport, light harvesting, oxygen evolution, and carbon fixation that are covered in lectures, they may have only a very shallow, and in some cases flawed, understanding of what these processes really are unless some form of experiments are performed in the lab!” Dr. Kent G. Apostol, Bethel University
